**Step #1 – Properly Package Linear Fluorescent Lamps**
1. All precautions should be taken to eliminate breakage of lamps. Extra charges may result from excessive breakage.
2. Lamps should be packaged in strong corrugated boxes. Original cardboard boxes from the manufacturer are recommended. Place lamps carefully into the boxes to avoid breakage. **DO NOT TAPE LAMPS TOGETHER. ADDITIONAL FEES MAY BE CHARGED IF TAPE LAMPS ARE RECEIVED.**
3. Egg crate inserts are not required, but boxes should be filled to capacity, leaving no void space.
4. All box ends must be secured with tape. Three-inch PVC tape is recommended. VEOLIA WILL NOT ACCEPT CONTAINERS FOR SHIPMENT THAT HAVE LAMPS EXPOSED OR PROTRUDING FROM THE PACKAGING.
5. **DO NOT** place items other than straight linear fluorescent lamps into lamp boxes.

**Step #2 – Properly Label Fluorescent Lamp Boxes**
1. All packages used for containing fluorescent lamps must include a label that states “Universal Waste Lamps” with an “Accumulation Start Date” (the beginning date the lamps were stored for disposal) as per 40 CFR 273. 
2. Certain States require additional language for labeling. Please contact your state regulatory agency for proper guidance.
3. Customers are encouraged to tape lamp inventories to the end of each box. An inspection will be made at Veolia of all containers to verify waste streams received. Each container of fluorescent lamps will be recycled for the full amount of lamps as received on the shipment.

**Step #3 – Properly Palletize Fluorescent Lamp Boxes**
1. Palletizing lamps correctly ensures compliance with DOT regulations regarding shipping fluorescent lamps.
2. Boxes must be placed on a pallet by stacking five (5) boxes across and no more than five boxes high. **DO NOT EXCEED 48” IN HEIGHT.**
3. **PLACE 4FT BOXES ON A 4FT PALLET AND 8FT BOXES ON AN 8FT PALLET.**
4. Once they have been placed on a pallet, the boxes must be secured with shrink or stretch wrap. (Remember to wrap the pallet as well, to minimize shifting in transit).
5. Please remember that when reusing boxes after a retrofit, switching lamps in manufacturers box from T12 to T8 will result in a diameter difference. T12 lamps are 1.5” in diameter, T8 lamps are 1” in diameter.

**Step #4 – Apply Prepaid Stamp and Additional Regulatory Compliance Label**

1. When boxes are properly palletized and secured to pallet with shrink or stretch wrap, apply prepaid stamp to front of pallet.
2. Complete as required and adhere additional Regulatory Compliance Label to front of palletized and secured lamp boxes.
3. Palletized and secured lamp boxes should be stored indoors and protected against elements of weather. Wet packages will not be accepted. Whenever possible store lamps in an area that is easily accessible for pick-up while still maintaining the security of the lamps.

**Step #5 – Request a Bill of Lading**

1. When your container is full and secured following these instructions, call 1-888-669-9725 to have Veolia arrange a pickup and send you a Bill of Lading. DO NOT ARRANGE YOUR OWN PICKUP!
2. When you receive the Bill of Lading from Veolia, secure the BOL to the front of the palletized and secured lamp boxes, NEXT to the prepaid stamp. DO NOT COVER PREPAID STAMP.
3. Please allow 5-7 days for pickup of your palletized and secured lamp boxes.
